

Our Visual Refiners software enhances search by enabling the development of rich user experiences, helping users across all industries quickly find needed information without the need to develop custom code. Users gain quick recognition of relevant content and can directly explore and take action from search results.

## WHAT WE OFFER

With support for Office 365 and SharePoint 2016, BA Insight Visual Refiners, which are tightly integrated with SharePoint Refiners, provide multiple options for drilldown, refinement, and content exploration including multi-select tree refiners, graphs, pie charts, bar charts, date pickers, and dashboard layouts. Collapsing refiners preserve precious screen real estate while surfacing the many different facets of content.

Large search result sets can produce thousands of different metadata values. A type-ahead “Search Within” feature allows users to navigate across large amounts of data quickly and with great precision. Multiple categories can be selected or deselected to explore search results.

Users are able to save, review, and rerun queries, including complex queries with multiple refinements applied. A web part provides immediate access to them, along with the display of query history. Complex queries can easily be bookmarked and replayed, and result sets can be exported into Excel for sharing, auditing, and further analysis.

## WHAT OUR CUSTOMERS ARE SAYING

“Using BA Insight’s Visual Refiners has provided our users with a greatly enhanced search experience and one that has resembled a search experience they would have on a leading internet site, such as Amazon. By making the search interface more visually appealing and user friendly, our SharePoint intranet adoption has increased tenfold.”

– Senior Manager, Information Services, Leading Professional Services Organization

Office 365 is cloud-based productivity, powered by Microsoft. You get the familiar Office applications, now always up-to-date. It brings enterprise-grade services to organizations of all sizes, from online meetings to sharing documents to business-class email.

## KEY USE CASES

### **BUSINESS-CLASS EMAIL**

Gain large, 50GB mailboxes with your own custom domain that can send messages up to 25MB in size, with contacts, shared calendars, and spam and malware protection. Available on PC, Mac, Windows Phone, iPhone, Android, and more.

### **CLOUD STORAGE**

Get 1TB to store, back up, and share files, accessible from almost any device, and even offline.

### **MEET ONLINE**

Hold scheduled or ad hoc online meetings for up to 250 participants, with screen sharing, audio and video, virtual whiteboards, polls, and shared notes. Anyone can participate through any HTML5 browser.

### **COLLABORATE, CHAT PRIVATELY**

Set up a social network that helps your company stay connected, share information across teams, and make faster, more informed decisions.

### **SAVE YOUR COMPANY MONEY**

Office 365 is available as a simple monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

### **SCALE YOUR BUSINESS QUICKLY AND FLEXIBLY**

Office 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business critical technology on up to five PCs/Macs and five mobile devices. Office 365 provides many plans to fit the right capability needs and price points for each user in your organization.

### **TECHNICAL SUPPORT**

Your Office 365 subscription comes with 24/7 support from a global network of experts, with 1-hour response for critical, service-impacting events.

### **FINANCIALLY BACKED SLA**

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service level agreement.

### **SIMPLIFIED IT MANAGEMENT**

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.
